GEOLOGIK HARITALASH**
fanidan
kurs ishini bajarish bo'yicha uslubiy ko'rsatmalar

I - qism

Toshkent – 2015

UDK.550.8:528

Tuzuvchilar:Zakirov R.T., Tulyaganova N.Sh.,AllayarovB.I.

«Strukturalar geologiyasi va geologik haritalash» fanidan kurs ishini bajarish bo'yicha uslubiy ko'rsatmalar. I qism Toshkent.:ToshDTU , 2015.

Ushbu uslubiy ko'rsatmada talabalar kurs ishini bajarishlari uchun zarur bo'ladigan geologik harita tuzish usullari, haritada tasvirlangan tog' jinslarining yotish elementlarini aniqlash, quduq ma'lumotlariga asoslanib qiya yotgan qatlarning yuzaga chiqqan chizig'ini topish, geologik kesmalar va stratigrafik ustun tuzish yo'llari keltirilgan.

Bundan tashqari, ko'rsatmada kurs ishining tarkibiy qismlari, kurs ishi boblarining mazmuni, harita va chizmalarni joylashtirish tartibi hamda kurs ishini himoya qilish qoidalari keltirilgan.

Ushbu uslubiy ko'rsatma Oliy ta'limning 5 311 800 – “Gidrogeologiya va muhandislik geologiyasi” ta'lim yo'nalishi bakalavrлari uchun mo'ljallangan.

Abu Rayhon Beruniy nomidagi Toshkent davlat texnika universiteti ilmiy-uslubiy kengashi qaroriga asosan chop etildi.

Taqrizchilar:

Umarov A.Z.

O'zMU, Geologiya fakulteti,
«Geokimyo, mineralogiya va
Petrografiya» kafedrasi mudiri,
g-m.f.n., dotsent

Mirhodjayev B.I.

ToshDTU «Foydali qazilmalar
geologiyasi va qidiruv ishlari»
kafedrasi g-m.f.n., dotsenti

Kirish

Respublikamizda barcha sohalarda bo‘lgani kabi, Gidrogeologiya sohasida ham zamon talabiga javob beradigan, ilm-fanning zamo-naviy yutuqlarini amaliyotda qo‘llay oladigan, intellektual salo-hiyatga ega bo‘lgan mutaxassislar tayyorlashga katta e’tibor berilmoqda. Hozirgi kunda ixtisoslik fanlaridan ma’ruza va amaliy mashg‘ulotlarning o‘zbek tili lotin imlosida olib borilishi talabala-rning bilim saviyalarining oshishiga olib kelmoqda. Lekin o‘zbek tili lotin imlosida mutaxassislik fanlaridan darsliklar, o‘quv va uslubiy qo‘llanmalarning yetishmasligi, bunday adabiyotlarni tayyorlashni taqozo etadi.

Strukturalar geologiyasi va geologik haritalash fani geologiya va gidrogeologiyaning barcha mutaxassislik yo‘nalishlarida ta’lim olayotgan talabalar uchun umumkasbiy fani bo‘lib, bu fan bo‘yicha talabalar ma’ruza va amaliyot mashg‘ulotlaridan tashqari, kurs ishini ham bajaradilar.

Strukturalar geologiya va geologik haritalash fanidan kurs ishi bajarishdan maqsad – talabalar ma’ruza va amaliyot darsida o‘rgangan bilimlarini mustahkamlash bilan birgalikda qatlamlarning fazoviy joylashishini tasavvur qilish mahoratini oshirish, geologik haritada tasvirlangan tog‘ jinslarining yotish elementlarini aniqlash, burg‘ilash quduqlari yordamida aniqlangan qatlamning yotish elementlaridan foydalanib uning yuzaga chiqqan chegaralarini topish, qatlamlarning qalinliklaridan foydalanib, ularning chegaralarini aniqlab, geologik harita tuzishdan hamda tuzilgan harita bo‘yicha geologik kesmalar va stratigrafik ustun tuzib, o‘rganilayotgan maydonning geologik tuzilishi to‘g‘risida umumiy ma’lumotlarni mustaqil tahlil qilishdan iborat.

Ushbu uslubiy ko‘rsatmada kurs ishini tayyorlashning uslubiyati, ishni bajarishdagi vazifalar ketma-ketligi, ish davomida yig‘ilgan harita va chizmalarni tahrirlash, tuzilgan geologik harita, kesmalar va stratigrafik ustundan foydalanib, o‘rganilayotgan maydonning geologik tuzilishi to‘g‘risida yozma tahlilning

mazmuni, unda keltiriladigan bo‘limlarning mazmuni to‘g‘risida ma’lumot berilgan.

Uslubiy ko‘rsatmaning so‘nggi qismida kurs ishi variantlari keltirilgan.

Ishning maqsadi va vazifalari

Kurs ishining maqsadi – talabalarni “Strukturalar geologiyasi va geologik haritalash” fanidan olgan bilimlarini mustahkam-lashdan iborat. Ishning vazifalariga quyidagilar kiradi: tog‘ jinsi qatlamlarining bir turini yagona geologik strukturaga umum-lashtirish; bu strukturaning fazoviy interpretasiyasini blokdiag-ramma va kesmalar misolida o‘zlashtirish; strukturaning geologik tuzilishini yozish. Kurs ishining yozma qismi A4 formatli qog‘ozda 10–15 bet bo‘lishi kerak.

Kurs ishi talabani geologik strukturalarni mustaqil tahlil qilishga o‘rgatadi va o‘quv hamda ishlab chiqarish amaliyotlariga tayyorlaydi.

Hisobot quyidagi bo‘limlardan tashkil topishi kerak:

Kirish.

- 1. Rayonning tabiiy-geografik sharoiti, orqidrografiyasi**
- 2. Rayonning geologik tuzilishi**

A. Stratigrafiya.

- 3. Rayonning geologik strukturalari.**
- 4. Rayonning geologik rivojlanish tarixi.**

Xulosa

Foydalilanilgan adabiyotlar ro‘yxati.

Hisobot bo‘limlarinig mazmuni Kirish

Bu bo‘limda amaliy ishlarning aniq maqsadi, o‘tish mudatlari, hajmi, amaliy ish usullari, marshrutlar soni, amaliy ishlar olib boriladigan maydonning geografik o‘rni to‘g‘risida ma’lumotlar beriladi. Agar amaliy ish jarayonida aerokosmo-

fotosuratlaridan foydalanilgan bo'lsa, bu fotosuratlarning sifatlari, ayrim joylarning suratbopligi tahlil qilinadi va tegishli xulosalar chiqariladi.

1. Rayonning tabiiy-geografik sharoiti, orogidrografiyasi

Bu bobda relyeflarning xususiyati, ularning past-balandlik darajasi, vodiy va suv ayirg'ichlarining mutlaq va nisbiy balandliklari, daryo va soy tarmoqlarining xususiyatlari, uzunligi, chuqurligi, eni, oqish tezligi, yer yuzasining ochiqlik darajasi to'liq beriladi. Shuningdek rayonning iqlimi, o'simlik va hayvonot dunyosi, mahalliy aholisi, iqtisodiy xususiyati va o'zlashtirish darajasi, tog' sanoati va tog' inshootlarining ahvoli, mashina va temir yo'l, telegraf aloqalari to'g'risidagi ma'lumotlar keltiriladi.

2. Rayonning geologik tuzilishi

A.Stratigrafiya

Bu bo'lim boshqalariga nisbatan eng muhim hisoblanadi va hajmi jihatidan birmuncha ko'proqdir. Bu qismda rayonda tarqalган hamma cho'kindi vulkanogen va metamorfik jins bo'limlari qadimgilaridan yoshlariга qarab batafsil yoritiladi. Kesmalarni o'rganish sistemalar, bo'linmalar, turkumlar bo'yicha olib boriladi. Ularning o'zaro munosabatlari aniqlanadi. Bobning boshida maydon stratigrafik kesmasining umumiyl tuzilishi beriladi. So'ngra har bir bo'linmaga to'liq litologik ta'riflar keltiriladi.

Tog' jinslarining qalinligi, yoshi, fatsial farqi, hamma tanaf-fuslar, nomuvofiqliklar aniqlanib, ularga to'liq izohlar beriladi.

3. Rayonning geologik strukturalari

Bo‘limda rayonning viloyat umumiy tektonik strukturasidagi o‘rni, asosiy struktura bo‘linmalari (etaj yoki yarus, burmachang kompleks) tasvirlanadi. Har bir struktura bo‘linmasi batafsil yoritiladi. Yer qobig‘idagi tektonik harakatlarning tartibi, ro‘y bergen davri aniqlanadi. Rayondagi burma va uzilmalarning turlari ko‘rsatiladi. Shuningdek, maydondagi antiklinal va sinklinal strukturalarning joylashish shakkllari, morfologik turlariga tavsif beriladi. Ularning o‘lchamlari (eni, bo‘yi) aniqlanadi.

4. Rayonning geologik rivojlanish tarixi

Bu bo‘lim avvalgi bo‘limlarning hamma geologik materialini tahlil qilishga asoslangan va birmuncha murakkabdir. Bu bo‘limda rayonning taraqqiyoti tarixini yoritish, tahlil qilishga imkoniyati bo‘lgan qadimgi davrlardan boshlanadi. Rayonning geologik taraqqiyotida ma’lum tektonik va paleogeografik sharoitni aks ettiruvchi yirik, asosiy bosqichlarni ajratish zarur va taraqqiyot tarixini shu bosqichlarga ko‘ra tasvirlash kerak. Har bir bunday bosqichda o‘ziga xos tektonik strukturalar paydo bo‘lgan. Shuning uchun bu oraliqdagi davrning paleogeografik sharoitini, tektonik harakatlar izchilligini dalillar asosida tiklashga harakat qilish kerak.

Xulosa

Bu bo‘limning mazmuni rayon bo‘yicha o‘tkazilgan geologik ishlarning natijalariga bog‘liq. Bu yerda qilingan ishlarning yakuni, nazariy va amaliy jihatdan ahamiyati, foydali qazilma boyliklarga bo‘lgan istiqbollarini aniqlashdagi o‘rni, rayon bo‘yicha navbatdagi geologik qidiruv ishlarning vazifalari aniqlanadi. Shuningdek, ish jarayonida yechilmagan geologik va tektonik muammolar ko‘rsatilib, sabablari aniqlanadi va ularni hal qilish yo‘llari belgilanadi.

Ishni tashkil qilish

Talabalarga vazifa berishdan oldin guruhga uni qanday bajarilishi to‘g‘risida instruktaj o‘tkaziladi. Keyinchalik talabalar individual konsultatsiyalar oladilar. Berilgan ma’lumotlar asosida vazifani bajarish ketma-ketligi quyidagichadir:

- faktik ma’lumotlar haritasini tuzish;
- geologik karta tuzish;
- geologik kesma chizish;
- stratigrafik kolonka tuzish;
- hisobot yozish.

Kurs ishining himoyasi komissiya va talabalar guruhi oldida bo‘ladi.

Himoyada talaba 10-12 minut ishi yuzasidan ma’ruza qiladi va savollarga javob beradi.

Geologik kesma tuzish

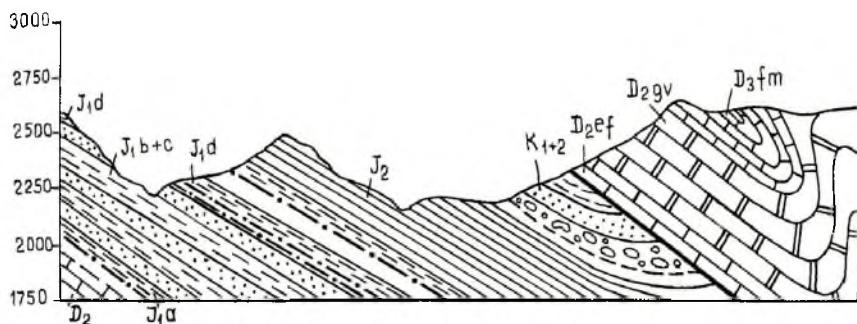

Geologik haritada tasvirlangan tog‘ jinslari qatlamlarining tarqalish qonuniyatlarini, yotish shakllarini, qatlamlarning o‘zaro munosabatlarini va o‘rganilayotgan maydonning relyefini to‘liq ifodalash maqsadida kesmalar tuziladi. Geologik kesma Yer yuzasining ma’lum bir chuqurlikkacha bo‘lgan vertikal kesimining tuzilishini tasvirlaydi.

Kesmada vertikal va gorizontal masshtablar geologik harita masshtabi bilan bir xil bo‘lishi kerak. Agar jinslar yotiqligini gorizontal yotgan bo‘lsa, kesmaning vertikal masshtabini kattalashtirish mumkin. Kesmalar geologik haritadagi shartli belgilarni asosida tuziladi. Kesmada geologik jismning yotish sharoitlari va shakli (formasi), qalinligining o‘zgarishi, strukturalari, jins turi va yoshi, uzilmalar ko‘rsatiladi.

Geologik kesmalar yuqoridaan kesma chizig‘i, pastdan esa bazis chizig‘i va yon tomonlardan vertikal miqyos chiziqlari orqali chegaralangan bo‘ladi (**1-rasm**). Kesma chizig‘i relyef yuzasining

vertikal tekislik bilan kesishish chizig‘idir. Bazis chizig‘i esa geologik haritalar bo‘yicha kesmalar tuzganda yotqiziqlarning yotish shakllari va strukturalarni yetarli darajada ko‘rsata oladigan chuqurlikdan o‘tkazilgan gorizontal chiziqdir.

Geologik kesma tuzish uchun belgilangan yo‘nalish bo‘yicha ikkita nuqta to‘g‘ri chiziq bilan tutashtiriladi. Bu chiziq haritada tasvirlangan tog‘ jinslari haqida to‘la ma’lumot bera oladigan yo‘nalish bo‘ylab o‘tkazilishi hamda qatlamlar yo‘nalishiga ko‘ndalang yo‘nalgan bo‘lishi kerak. Agar qatlam yo‘nalishiga ko‘ndalang olingan chiziq maydonning geologik tuzilishi haqida to‘liq ma’lumot bera olmasa, qo‘sishmcha kesma chiziqlari olinadi. Haritada belgilangan kesma chizig‘ining har ikkala uchi A–A (B–B) harflari yoki I–I (II–II) raqamlari bilan belgilanadi. Geologik kesmalarda vertikal va gorizontal miqyoslar bir–biriga teng bo‘lishi hamda ular harita miqyosiga to‘g‘ri kelishi kerak.

1-rasm. Geologik kesmaning umumiy ko‘rinishi

Stratigrafik ustun tuzish

Stratigrafik ustun geologik haritada tasvirlangan hududda rivojlangan cho‘kindi, vulkanogen va metamorfik jinslar nisbiy yoshiga qarab tabaqalangan va litologik tarkibi bo‘yicha ajratilgan holda tuziladi.

Stratigrafik ustun tarkibida kengligi 2,5–3,0 sm li litologik ustun bo‘lib, unda harita maydoni yuzasida tarqalgan va shunindek, burg‘i quduqlari yordamida ochilgan cho‘kindi, vulkanogen va metamorfik jinslar shartli belgililar yordamida tanlangan miqyosda qalinligi bilan ko‘rsatiladi . Litologik ustunda tog‘ jinslari haritada qabul qilingan stratigrafik bo‘limlar bo‘yicha tabaqalangan holda tasvirlanadi. Stratigrafik bo‘limlar orasidagi munosabat muvofiq bo‘lsa, to‘g‘ri gorizontal chiziq, nomufovij bo‘lsa to‘lqinli chiziq bilan ko‘rsatiladi. Bir xil litologik tarkibdagi juda qalin qatlamlar parallel to‘lqinli chiziqlar bilan uzib ko‘rsatiladi. Agar qatlam qalinligi juda kichik bo‘lib, tanlangan miqyosda uni tasvirlash imkonli bo‘lmasa, u miqyossiz holda ko‘zga ko‘rinadigan qalinlikda tasvirlanadi.

Litologik ustunning chap tomonida tog‘ jinslarining nisbiy yoshi stratigrafik tabaqalar bo‘yicha (eratema, sistema, bo‘lim, yarus, svita, gorizont va boshqalar) tabaqalarga ajratilib ko‘rsatiladi va ularning indekslari beriladi.

Litologik ustunning o‘ng tomonida qatlamlarning qalinligi, tarkibi, ulardagи foydali qazilmalar, hayvon va o‘simlik qoldiriplari ko‘rsatiladi. Agar tasvirlanuvchi qatlam qalinligi o‘zgaruvchan bo‘lsa, qalinlik ustuni grafasida uning eng kichik va katta qiymati, litologik ustunda esa miqyos bo‘yicha maksimal qalinligi bilan beriladi. Stratigrafik ustunda intruziv jinslar ko‘rsatilmaydi.

Geologik kuzatuv nuqtalari tegishli variantdagi maydonning topografik haritaga tushirilgan.

36	To‘q kulrang gillar (yoshi-o‘rtа J). Qatlamning yotish azimuti 265° ,

	yotish burchagi 28° .
37	To‘q kulrang gillar (yoshi-o‘rtal J). Qatlamning yotish azimuti 270° , yotish burchagi 28° .
38	Och kulrang qumtoshlar (yoshi-yuqori J). Qatlamning yotish azimuti 270° , yotish burchagi 31° .
39	Och kulrang qumtoshlar (yoshi-yuqori J). Qatlamning yotish azimuti 265° , yotish burchagi 31° .
40	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 270° , yotish burchagi 31° .
41	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 270° , yotish burchagi 31° .
42	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 275° , yotish burchagi 31° .
43	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 270° , yotish burchagi 31° .
44	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 280° , yotish burchagi 31° .
45	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 260° , yotish burchagi 31° .
46	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 285° , yotish burchagi 31° .
47	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 90° , yotish burchagi 28° .
48	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 50° , yotish burchagi 28° .
49	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 35° , yotish burchagi 28° .
50	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 50° , yotish burchagi 31° .
51	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 225° , yotish burchagi 31° .
52	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 70° , yotish burchagi 31° .
53	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 210° , yotish burchagi 31° .
54	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 260° , yotish burchagi 31° .
55	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti

	100°, yotish burchagi 31°.
56	To‘q kulrang gillar (yoshi- o‘rtा J). Qatlamning yotish azimuti 95°, yotish burchagi 28°.
57	To‘q kulrang gillar (yoshi- o‘rtа J). Qatlamning yotish azimuti 45°, yotish burchagi 28°.
58	To‘q kulrang gillar (yoshi- o‘rtа J). Qatlamning yotish azimuti 45°, yotish burchagi 28°.
59	To‘q kulrang gillar (yoshi- o‘rtа J). Qatlamning yotish azimuti 30°, yotish burchagi 28°.
60	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 40°, yotish burchagi 28°.
61	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 105°, yotish burchagi 28°.
62	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 50°, yotish burchagi 31°.
63	Och kulrang qumtoshlar (yoshi- yuqori J).
64	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 280°, yotish burchagi 31°.
65	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 245°, yotish burchagi 31°.
66	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 245°, yotish burchagi 31°.
67	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 260°, yotish burchagi 31°.
68	Och kulrang qumtoshlar (yoshi- yuqori J). Qatlamning yotish azimuti 240°, yotish burchagi 31°.
69	Qizg‘ish rangli konglomeratlar (yoshi- K).
70	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 245°, yotish burchagi 31°.
71	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 90°, yotish burchagi 31°.
72	Qizg‘ish rangli konglomeratlar (yoshi- K).
73	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 240°, yotish burchagi 31°.
74	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 40°, yotish burchagi 31°.
75	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti 45°, yotish burchagi 31°.
76	Qizg‘ish rangli konglomeratlar (yoshi- K). Qatlamning yotish azimuti

	240°, yotish burchagi 31°.
77	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 255°, yotish burchagi 28°.
78	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 255°, yotish burchagi 28°.
79	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 230°, yotish burchagi 28°.
80	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 230°, yotish burchagi 28°.
81	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 300°, yotish burchagi 28°.
82	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 230°, yotish burchagi 28°.
83	To‘q kulrang gillar (yoshi- o‘rtal J). Qatlamning yotish azimuti 240°, yotish burchagi 28°.
84	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 230°, yotish burchagi 28°.
85	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 275°, yotish burchagi 28°.
86	Yirik qatlamlı ohaktoshlar (yoshi- quyi J).
87	Yirik qatlamlı ohaktoshlar (yoshi- quyi J).
88	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 230°, yotish burchagi 28°.
89	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 270°, yotish burchagi 28°.
90	Yirik qatlamlı ohaktoshlar (yoshi- quyi J). Qatlamning yotish azimuti 210°, yotish burchagi 28°.
91	Yirik qatlamlı ohaktoshlar (yoshi- quyi J).

Kuzatuv nuqtasi	Kuzatuv nuqtasidan olingan ma'lumotlar
1	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 15° , yotish burchagi 35° .
2	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 180° , yotish burchagi 35° .
3	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Bu nuqtadan antiklinal o'qi o'tadi. Uning yo'nalish azimuti 90° .
4	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 15° , yotish burchagi 35° .
5	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 20° , yotish burchagi 33° .
6	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 20° , yotish burchagi 31° .
7	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 25° , yotish burchagi 33° .
8	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 30° , yotish burchagi 32° .
9	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 15° , yotish burchagi 35° .
10	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Bu nuqtadan antiklinal o'qi o'tadi. Uning yo'nalish azimuti 80° .
11	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 165° , yotish burchagi 33° .
12	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 150° , yotish burchagi 32° .
13	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 155° , yotish burchagi 31° .
14	Kulrang, och kulrang alevrolitlar (yoshi - o'rta D). Qatlamning yotish azimuti 150° , yotish burchagi 31° .
15	Kulrang, och kulrang alevrolitlar (yoshi - o'rta D). Qatlamning yotish

	azimuti 147° , yotish burchagi 31° .
16	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 145° , yotish burchagi 33° .
17	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 153° , yotish burchagi 33° .
18	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 180° , yotish burchagi 33° .
19	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 200° , yotish burchagi 35° .
20	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 200° , yotish burchagi 33° .
21	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 250° , yotish burchagi 34° .
22	Kulrang, och kulrang alevrolitlar (yoshi - o'rtа D). Qatlamning yotish azimuti 260° , yotish burchagi 35° .
23	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D). Qatlamning yotish azimuti 160° , yotish burchagi 28° .
24	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D). Qatlamning yotish azimuti 175° , yotish burchagi 28° .
25	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D). Qatlamning yotish azimuti 180° , yotish burchagi 29° .
26	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D). Qatlamning yotish azimuti 210° , yotish burchagi 27° .
27	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D). Qatlamning yotish azimuti 180° , yotish burchagi 27° .
28	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D).
29	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 200° , yotish burchagi 33° .
30	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 230° , yotish burchagi 31° .
31	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 255° , yotish burchagi 32° .
32	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 260° , yotish burchagi 32° .
33	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 260° , yotish burchagi 31° .
34	To'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D).

35	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 330° , yotish burchagi 33° .
36	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 300° , yotish burchagi 35° .
37	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 270° , yotish burchagi 35° .
38	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 270° , yotish burchagi 34° .
39	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 245° , yotish burchagi 32° .
40	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 235° , yotish burchagi 33° .
41	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 240° , yotish burchagi 35° . Nuqtadan 100m shimolda uzilma o’tadi. Uning yo’nalish azimuti 70° .
42	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 220° , yotish burchagi 33° . Nuqtadan 50m shimolda uzilma o’tadi. Uning yo’nalish azimuti 75° .
43	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Nuqtadan 40m janubda uzilma o’tadi. Uning yo’nalish azimuti 75° .
44	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 330° , yotish burchagi 34° .
45	To‘q kulrang ohaktoshlar; tarkibida angidrit qatlamchalari uchraydi (yoshi - quyi D). Bu nuqtadan uzilma o’tadi.
46	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 55° , yotish burchagi 35° .
47	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 25° , yotish burchagi 35° .
48	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 30° , yotish burchagi 31° .
49	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 10° , yotish burchagi 32° .
50	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 350° , yotish burchagi 32° .
51	Kulrang, och kulrang alevrolitlar (yoshi - o’rtta D). Qatlamning yotish azimuti 330° , yotish burchagi 33° .
52	Bu nuqtadan ikki qatlam kontakti (chegarasi) o’tadi. G’arbda kulrang,

	och kulrang alevrolitlar (yoshi - o'rtा D), sharqda to'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalar uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 270° , yotish burchagi 35° .
53	Bu nuqtadan ikki qatlam kontakti (chegarasi) o'tadi. G'arbda kulrang, och kulrang alevrolitlar (yoshi - o'rtा D), sharqda to'q kulrang ohaktoshlar; tarkibida angidrit qatlamchalar uchraydi (yoshi - quyi D). Qatlamning yotish azimuti 250° , yotish burchagi 34° .
54	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 270° , yotish burchagi 33° .
55	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 245° , yotish burchagi 33° .
56	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 230° , yotish burchagi 33° .
57	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 190° , yotish burchagi 31° .
58	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 180° , yotish burchagi 25° .
59	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 180° , yotish burchagi 35° .
60	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 5° , yotish burchagi 34° .
61	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 10° , yotish burchagi 32° .
62	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 90° , yotish burchagi 32° .
63	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 130° , yotish burchagi 29° .
64	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 280° , yotish burchagi 29° .
65	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 290° , yotish burchagi 32° .
66	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 110° , yotish burchagi 31° .
67	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 300° , yotish burchagi 31° .
68	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 300° , yotish burchagi 29° .
69	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 300° , yotish burchagi 31° .

70	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 300° , yotish burchagi 33° .
71	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 120° , yotish burchagi 33° .
72	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 150° , yotish burchagi 34° . Nuqtadan 40m shimolda uzilma o'tadi. Uning yo'nalish azimuti 75° .
73	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 150° , yotish burchagi 35° . Nuqtadan 60m shimolda uzilma o'tadi. Uning yo'nalish azimuti 75° .
74	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 130° , yotish burchagi 35° .
75	Kulrang, och kulrang alevrolitlar (yoshi - o'rtा D). Qatlamning yotish azimuti 120° , yotish burchagi 35° .
76	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D)
77	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D)
78	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D)
79	Qizg'ish, saralanmagan qumtoshlar (yoshi - yuqori D)
80	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 260° , yotish burchagi 34° .
81	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 255° , yotish burchagi 29° .
82	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 230° , yotish burchagi 35° .
83	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 270° , yotish burchagi 33° .
84	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 285° , yotish burchagi 32° .
85	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 280° , yotish burchagi 33° .
86	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 270° , yotish burchagi 35° .
87	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 265° , yotish burchagi 35° .
88	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 265° , yotish burchagi 35° .
89	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 265° , yotish burchagi 34° .

90	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 260° , yotish burchagi 29° .
91	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 300° , yotish burchagi 33° .
92	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 85° , yotish burchagi 31° .
93	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 275° , yotish burchagi 31° .
94	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 260° , yotish burchagi 27° .
95	Och kulrang alevrolit va gil qatlamchalari (yoshi - yuqori S). Qatlamning yotish azimuti 95° , yotish burchagi 25° .
96	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 300° , yotish burchagi 33° .
97	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 285° , yotish burchagi 29° .
98	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 280° , yotish burchagi 31° .
99	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 270° , yotish burchagi 32° .
100	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 255° , yotish burchagi 32° .
101	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 260° , yotish burchagi 31° .
102	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 265° , yotish burchagi 33° .
103	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 105° , yotish burchagi 35° .
104	Och kulrang gillar (yoshi - quyi S). Qatlamning yotish azimuti 105° , yotish burchagi 35° .

8	Konglomeratlar (yoshi – paleosen). Yotish azimuti 285° , yotish burchagi 30° .
9	Uzilma. Yotish azimuti 270° , yotish burchagi 70° . Sharqda – qumtoshlar (yoshi – yuqori J), g'arbda - konglomeratlar (yoshi – paleosen).
10	Uzilma. Yotish azimuti 270° , yotish burchagi 70° . Sharqda – gravelitlar (yoshi – K), g'arbda - konglomeratlar (yoshi – paleosen).
11	Mergellar (yoshi – eosen). Sinklinal o'qi.
12	Mergellar (yoshi – eosen). Sinklinal o'qi.
13	Uzilma. Yotish azimuti 255° , yotish burchagi 70° . Sharqda – gravelitlar (yoshi – K), g'arbda - konglomeratlar (yoshi – paleosen).
14	Uzilma. Yotish azimuti 290° , yotish burchagi 70° . Sharqda – gravelitlar (yoshi – K), g'arbda - konglomeratlar (yoshi – paleosen).
15	Dolomitlar (yoshi – o'rta J). Yotish azimuti 277° , yotish burchagi 30° .
16	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 277° , yotish burchagi 28° .
17	Kontakt. Janubda kremniyli jinslar (yoshi – quyi T), shimolda – intruziv jinslar (yoshi – rifey).
18	Gilli slaneslar (yoshi – o'rta T). Yotish azimuti 275° , yotish burchagi 31° .
19	Alevrolitlar (yoshi – quyi J). Yotish azimuti 275° , yotish burchagi 31° .
20	Dolomitlar (yoshi – o'rta J). Yotish azimuti 270° , yotish burchagi 30° .

21	Gilli slaneslar (yoshi – o'rtta T). Yotish azimuti 268° , yotish burchagi 30°
22	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 270° , yotish burchagi 30° .
23	Kontakt. Janubi g'arbda kremniyli jinslar (yoshi – quyi T), shimoli-sharqda – intruziv jinslar (yoshi – rifej).
24	Dolomitlar (yoshi – o'rtta J). Yotish azimuti 275° , yotish burchagi 30° .
25	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 275° , yotish burchagi 30° .
26	Kontakt. G'arbda Kremniyli jinslar (yoshi – quyi T), sharqda – intruziv jinslar (yoshi – rifej).
27	Alevrolitlar (yoshi – quyi J). Yotish azimuti 275° , yotish burchagi 31°
28	Kontakt. Sharqda kremniyli jinslar (yoshi – quyi T), g'arbda – intruziv jinslar (yoshi – rifej).
29	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 80° , yotish burchagi 28° .
30	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 80° , yotish burchagi 28° .
31	Gilli slaneslar (yoshi – o'rtta T). Yotish azimuti 91° , yotish burchagi 30°
32	Kontakt. Sharqda kremniyli jinslar (yoshi – quyi T), g'arbda – intruziv jinslar (yoshi – rifej).
33	Gilli slaneslar (yoshi – o'rtta T). Yotish azimuti 110° , yotish burchagi 30°
34	Kontakt. Sharqda kremniyli jinslar (yoshi – quyi T), g'arbda – intruziv jinslar (yoshi – rifej).
35	Gilli slaneslar (yoshi – o'rtta T). Yotish azimuti 110° , yotish burchagi 28°
36	Kontakt. G'arbda kremniyli jinslar (yoshi – quyi T), sharqda – intruziv jinslar (yoshi – rifej).
37	Kontakt. G'arbda kremniyli jinslar (yoshi – quyi T), sharqda – intruziv jinslar (yoshi – rifej).
38	Kontakt. Sharqda kremniyli jinslar (yoshi – quyi T), g'arbda – intruziv jinslar (yoshi – rifej).
39	Gilli slaneslar (yoshi – o'rtta T). Yotish azimuti 115° , yotish burchagi 30°
40	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 113° , yotish burchagi 30° .
41	Alevrolitlar (yoshi – quyi J). Yotish azimuti 115° , yotish burchagi 30°

42	Dolomitlar (yoshi – o'rtal J). Yotish azimuti 115° , yotish burchagi 30° .
43	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 80° , yotish burchagi 28° .
44	Alevrolitlar (yoshi – quyi J). Yotish azimuti 80° , yotish burchagi 31°
45	Uzilma. Yotish azimuti 85° , yotish burchagi 70° . G'arbda - dolomitlar (yoshi – o'rtal J), sharqda - gravelitlar (yoshi – K)
46	Uzilma. Yotish azimuti 90° , yotish burchagi 70° . G'arbda - qumtoshlar (yoshi – yuqori J), sharqda - konglomeratlar (yoshi – paleosen)
47	Mergellar (yoshi – eosen). Sinklinal o'qi.
48	Konglomeratlar (yoshi – paleosen). Yotish azimuti 125° , yotish burchagi 30° .
49	Gravelitlar (yoshi – K). Yotish azimuti 255° , yotish burchagi 30° .
50	Konglomeratlar (yoshi – paleosen) . Sinklinal o'qi.
51	Gravelitlar (yoshi – K). Yotish azimuti 120° , yotish burchagi 30° .
52	Uzilma. Yotish azimuti 107° , yotish burchagi 75° . Sharqda - qumtoshlar (yoshi – yuqori J), G'arbda - dolomitlar (yoshi – o'rtal J).
53	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 113° , yotish burchagi 30° .
54	Organogenli ohaktoshlar (yoshi – yuqori T). Yotish azimuti 105° , yotish burchagi 30° .
55	Uzilma. Yotish azimuti 90° , yotish burchagi 75° . Sharqda - qumtoshlar (yoshi – yuqori J), g'arbda - alevrolitlar (yoshi – quyi J).
56	Gravelitlar (yoshi – K). Yotish azimuti 90° , yotish burchagi 32° .
57	Konglomeratlar (yoshi – paleosen). Yotish azimuti 90° , yotish burchagi 32° .
58	Uzilma. Yotish azimuti 85° , yotish burchagi 75° . Sharqda - dolomitlar (yoshi – o'rtal J), g'arbda - alevrolitlar (yoshi – quyi J).
59	Qumtoshlar (yoshi – yuqori J). Yotish azimuti 85° , yotish burchagi 30°
60	Uzilma. Sharqda - qumtoshlar (yoshi – yuqori J), g'arbda - alevrolitlar (yoshi – quyi J).
61	Konglomeratlar (yoshi – paleosen). Sinklinal o'qi.
62	Gravelitlar (yoshi – K). Sinklinal o'qi
63	Gravelitlar (yoshi – K). Sinklinal o'qi.
64	Uzilma. Sharqda - qumtoshlar (yoshi – yuqori J), g'arbda - qumtoshlar (yoshi – yuqori J).
65	Uzilma. Yotish azimuti 110° , yotish burchagi 75° . Sharqda - gravelitlar (yoshi – K), G'arbda - umtoshlar (yoshi – yuqori J).
66	Uzilma. Sharqda - Konglomeratlar (yoshi – paleosen), g'arbda -

	gravelitlar (yoshi – K).
67	Uzilma. Sharqda - Konglomeratlar (yoshi – paleosen), g'arbda - konglomeratlar (yoshi – paleosen).
68	Uzilma. Yotish azimuti 80° , yotish burchagi 75° . Sharqda - konglomeratlar (yoshi – paleosen), g'arbda - gravelitlar (yoshi – K).
69	Uzilma. Yotish azimuti 80° , yotish burchagi 70° . Sharqda - Gravelitlar (yoshi – K), G'arbda - Qumtoshlar (yoshi – yuqori J).
70	Gravelitlar (yoshi – K). Yotish azimuti 300° , yotish burchagi 30° .
71	Qumtoshlar (yoshi – yuqori J). Yotish azimuti 270° , yotish burchagi 30° .
72	Uzilma. Yotish azimuti 100° , yotish burchagi 75° . Sharqda - Gravelitlar (yoshi – K), G'arbda - Qumtoshlar (yoshi – yuqori J).
73	Gravelitlar (yoshi – K). Yotish azimuti 250° , yotish burchagi 32° .
74	Uzilma. Yotish azimuti 115° , yotish burchagi 75° . Sharqda - Konglomeratlar (yoshi – paleosen), g'arbda - gravelitlar (yoshi – K).
75	Qumtoshlar (yoshi – yuqori J). Yotish azimuti 250° , yotish burchagi 30° .
76	Dolomitlar (yoshi – o'rta J). Yotish azimuti 270° , yotish burchagi 30° .
77	Qumtoshlar (yoshi – yuqori J). Yotish azimuti 300° , yotish burchagi 32° .
78	Konglomeratlar (yoshi – paleosen). Yotish azimuti 270° , yotish burchagi 30° .
79	Gravelitlar (yoshi – K). Yotish azimuti 255° , yotish burchagi 32° .
80	Qumtoshlar (yoshi – yuqori J). Yotish azimuti 260° , yotish burchagi 29° .
81	Dolomitlar (yoshi – o'rta J). Yotish azimuti 270° , yotish burchagi 32° .
